

2010 AMERICAS HYPERWORKS TECHNOLOGY CONFERENCE

April 27 - 29: Novi, Michigan

Rock financial
SHOWPLACE

April 27 - 29
Novi, Michigan

Join us for the Manufacturing Process Driven Workshop: Integrating Manufacturing Feasibility with Product Design

HyperWorks Manufacturing Solutions can help incorporate manufacturing feasibility early in the product development cycle. This open forum of industry experts and Altair's senior software development personnel will discuss how manufacturing can impact your final product to significantly reduce lead time and cost.

This process-driven workshop is part of Day 3 of the 2010 Americas HyperWorks Technology Conference. This event brings together over 600 industry professionals and features keynotes and industry presentations given by industry thought leaders.

Date: April 29, 2010

Location: Rock Financial Showplace Novi, MI

Time: 12:45 p.m. – 3:15 p.m.

Cost: Complimentary, lunch will be provided

What is Manufacturing Solutions?

HyperWorks Manufacturing Solutions is a unified environment for multi-disciplinary manufacturing process simulation leveraging best-in-class solver technology for stamping, extrusion, injection molding, forging, and friction stir welding.

Why Should I Attend?

- To learn the benefits of HyperWorks Manufacturing Solutions that are customized for manufacturing feasibility assessment early in the product development cycle
- To see how to transfer manufacturing data into structural CAE
- To gain knowledge of how to optimize the manufacturing process to maximize product quality and minimize costs including material wastage

Who Should Attend?

- Product Designers
- FEA Analysts
- CAE Managers
- Process Development Engineers

Seating is limited: Click here to register for the Manufacturing Process-driven Workshop - Integrating Manufacturing Feasibility with Product Design today!
